#FEWD Week #1 Project: HTML/CSS Basics

###Description

For the first assignment, you will begin creating the beginnings of your first website. Take what you've learned from class and build a portfolio site that showcases all of the projects you'll be completing over the next few weeks. Build two pages - an 'About Page' and a 'Portfolio' - that link to one another. Your 'About Page' should describe your mission and value proposition and your 'Portfolio' should include descriptions of the work you [will] do for Relaxr, Startup Matchmaker, and CitiPix.

Student: _____

Project URL: _____

Technical Requirements	Does Not Meet Expectations (0)	Meets Expectations (1)	Exceeds Expectations (2)
Link both pages together using `a` tag			
Use a unique `title` and a			

single unique
`h1` tag

Show images
using `img` tags
including unique
`alt` attributes

Use an external
CSS stylesheet
to style your
pages

Select at least 5
elements on the
page and apply
at least 5
different css
properties
(`font-size` ,
`color` , `font-family` ,
`background` ,
`text-decoration`) to
these elements

Use at least 6

different HTML tags (`h1` , `h2` , `h3` , `h4` , `h5` , `h6` , `p` , `ul` , `ol` , `a` , `img`) on your pages

Follow naming conventions, maintain consistency across your .html and .css files

Indent nested elements to increase your code's readability

TOTAL: _____/16
